

SHAFT MELTING FURNACE

BEST PRICE GUARANTEED

HEATELLIGENCE FOR TOMORROW:
Take your melting processes to a new level
with shortest delivery time and with best
value for money.

- Delivery in only **14 weeks** from order
- **Holding without exposure to flames** for maximum energy and material efficiency
- Choose from **five different furnace types**

YOUR THERMAL PROCESS

MELTING

700 – 900 °C

LEADING
TECHNOLOGY

MAXIMUM EFFICIENCY

IOT-READY

GERMAN ENGINEERING

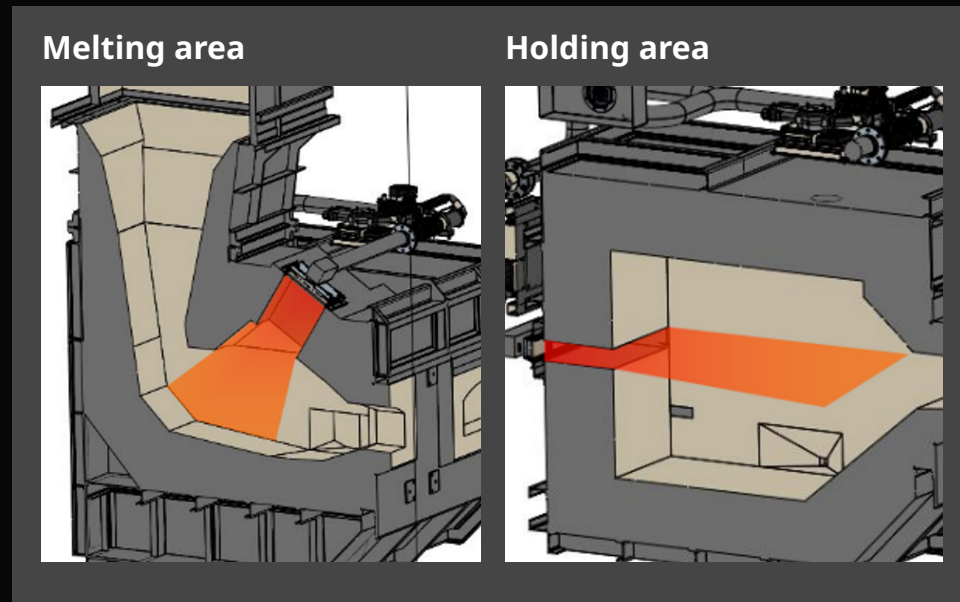

**PRIORITY ON
SUSTAINABILITY**

**H₂-READY
GREEN ELECTRICITY
ALL GASES**

OUR TECHNOLOGY

- **Comprehensive standard features** (17" Touch Display, Remote service module and -software, Efficiency monitoring in real time, integrated electronic troubleshooting manual)
- **Modul furnace refractory design** for quick revision and maintenance

- **Melting capacity:** up to 3 t/h
- **Holding capacity:** up to 6 t
- **Guaranteed specific consumption** depending on capacity : 500 – 650 kW (molten aluminium)
- **H2-ready / Suitable and retrofittable for operation with all gases / electricity**

ENERGY EFFICIENT OPERATION

Homogeneous and effective heat transfer without hot spots enables significant energy savings.

HIGH PRODUCT QUALITY AND MATERIAL EFFICIENCY

Homogeneous heating with flame-free **promeos® technology** guarantees a very high melt quality and much lower material losses.

OPTIMAL INVESTMENT CONDITIONS

Customers benefit from **state-of-the-art heating technology** for a **very attractive price**.

RELIABLE OPERATION

Robust construction and fast customer service from **promeos®** guarantee **high operational reliability!**
